25X1A MEMORANDUM FOR: Chief, [] PO432/SPO, NSA
25X1A ATTENTION: []
FROM: Chief, CIA/PID (NPIC)
SUBJECT: Communications Station Located at 58-34-20N 162-19-30E
(Kamchatka Peninsula)
REFERENCES: (a) Requirement []
(b) CIA/PID Project C 437-64

1. This memorandum is in response to your request dated 20 February 1964 requesting a search in the vicinity of 58-35N 162-10E for a possible AMM-related facility. A communications station was located at 58-34-20N 162-19-30E.

25X1D 2. The most recent useable coverage of the subject area, Mission []
25X1D [] was studied. A communications station was observed at 58-34-20N 162-19-30E (see attached print). It is situated on a small island one nautical mile northeast of the fishing village of Ivashka. Two lattice-type towers were visible; that is, the shadows were clearly visible at the northern end of the installation (see Area 1). These towers are sixty-five (65) feet high and 640 feet apart. The azimuth of a line intersecting these two towers is approximately 025/205 degrees. Identical electronic equipment buildings are located one hundred fifty (150) feet northwest of each commo tower. In addition, three (3) other small buildings are also associated with each commo tower.

The support area for the commo station is located approximately one-half nautical mile southwest of the commo towers (see Area 2). It contains 25 miscellaneous buildings, the largest being approximately two hundred (200) feet in length. An unidentified area containing one large (275 by 40 feet) and three other smaller buildings was observed at the southern end of the installation (see Area 3). One of these buildings (125 by 30 feet) appeared to be secured by a fence.

25X1D Previous coverage of the subject area was studied in order to establish
25X1D the initial date of activity in the area. Photography from Missions []
and [] revealed no activity in Area 1, but Areas 2 and 3 were present
25X1D and appeared unchanged when compared to Mission [] coverage. In other words,
25X1D the commo towers and the structures associated with them in Area 1 were constructed between []. No other useable coverage is available to establish the initial date of activity in Areas 2 and 3.
